

Knitwear tech pack & QC · **Cover**

Style header. Fill one workbook per style. Grey text in brackets is a hint; overwrite it.

Field	Value	Note
Style no.		
Style name / description		
Season		e.g. SS27, AW27
Buyer (company)		
Buyer contact		name, email
Factory		name, city, country
Factory contact		name, email
Product type		T-shirt / polo / sweatshirt-hoodie / other knit
HS code		confirm your 10-digit code with your broker
Fabric composition		e.g. 100% cotton; 60% cotton 40% polyester
GSM target		grams per square metre, after wash if agreed
GSM tolerance ± (%)		agree with factory
Fabric type		single jersey / interlock / piqué / French terry / fleece / other
Yarn count / gauge		e.g. 30s combed, 24 gauge
Fabric origin (country)		needed for origin tests (see "Origin & shipping docs")
Fabric mill		name and city
Colour(s) and Pantone TCX		one line per colourway
Destination market(s)		EU / UK / Canada / Japan / Korea / Australia / US / other
Label brand		
Order quantity per colour		
Target ex-factory date		
Date		dd mmm yyyy
Revision		e.g. R1; log changes below
Revision notes		what changed, who approved
Attachments		flat sketch, artwork, reference sample

Knitwear tech pack & QC · **BOM & trims**

Bill of materials. Supplier and origin columns matter: Korea (60% of FOB) and Australia (50% of factory cost) test where materials come from.

Item	Description / spec	Colour	Placement	Qty per garment	Supplier	Origin (country)	Notes
Body fabric	composition, GSM, knit type, width		Body, sleeves				
Rib / collar	e.g. 1x1 or 2x2 rib, composition, GSM		Neck, cuffs, hem				
Hood lining (if any)			Hood				
Sewing thread	e.g. 100% spun polyester, ticket no.	match body	All seams				
Neck tape			Back neck				
Main label	woven / printed, size		Centre back neck				
Care / composition label	in the language of each market of sale		Left side seam				fibre names and care symbols per market
Size label			With main label				
Country-of-origin label	e.g. "Made in Nepal"						required on each garment for the US
Buttons (polo)	size (ligne), material, holes		Placket				
Drawcord / eyelets (hoodie)			Hood				
Print / embroidery	artwork ref., ink or thread type		see Construction				
Hangtag	buyer brand; string / pin						
Price / barcode sticker			Hangtag				
Polybag	size, thickness, warning text, recycled content if claimed						
Carton	ply, size, marking						

Knitwear tech pack & QC · **Construction**

How the garment is made and packed. Stitch types are common knitwear options; choose and edit.

Area / operation	Specification	Stitch type	SPI / stitches per cm	Notes
Shoulder seam	<i>e.g. taped for stability</i>	<i>e.g. 4-thread overlock</i>		
Sleeve attach		<i>e.g. 4-thread overlock</i>		
Side seams		<i>e.g. 4-thread overlock</i>		
Body hem	<i>finished height</i>	<i>e.g. 2-needle coverstitch</i>		
Sleeve hem / cuff	<i>finished height</i>	<i>e.g. 2-needle coverstitch or rib cuff</i>		
Neck finish	<i>rib, binding or collar; back-neck tape</i>	<i>e.g. overlock + coverstitch topstitch</i>		
Placket (polo)	<i>number of buttons, button spacing</i>	<i>e.g. lockstitch</i>		
Hood (hoodie)	<i>lined / unlined, eyelets, drawcord</i>			
Pocket (hoodie)				
Label attach	<i>position, which operation</i>	<i>e.g. lockstitch</i>		
Print placement	<i>distance from HPS / CF, size of artwork</i>	<i>screen / DTF / other</i>		
Embroidery placement	<i>distance from HPS / CF, stitch count</i>			
Wash / finish	<i>e.g. garment wash, enzyme, softener; none</i>			
Pressing				

Packing

Item	Value	Notes
Fold size (W x L, cm)		folded garment in polybag
Folding method		e.g. tissue, back board, none
Pieces per polybag		
Pieces per carton		
Size / colour ratio per carton		solid or assorted
Carton size (L x W x H, cm)		
Max carton gross weight (kg)		check buyer warehouse and courier limits
Carton marking		PO, style, colour, size, qty, carton no., gross/net weight, "Made in Nepal"

Knitwear tech pack & QC · **Quality & testing**

Requirements you agree with the factory. Fill the requirement and method columns before bulk; attach lab reports to the PP sample.

Test / check	Requirement	Tolerance	Test method	Result	Notes
Fabric weight (GSM)	(target from Cover)	± ____ %	method agreed with buyer (e.g. ISO/AATCC)		before and after wash, if agreed
Dimensional change after wash: length		± ____ %	method agreed with buyer (e.g. ISO/AATCC)		state wash and dry method
Dimensional change after wash: width		± ____ %	method agreed with buyer (e.g. ISO/AATCC)		
Spirality / torque after wash		≤ ____ %	method agreed with buyer (e.g. ISO/AATCC)		side seam twist; worst in single jersey
Colour fastness to washing	grade ____		method agreed with buyer (e.g. ISO/AATCC)		change in shade and staining
Colour fastness to rubbing (dry / wet)	grade ____ / ____		method agreed with buyer (e.g. ISO/AATCC)		
Colour fastness to perspiration	grade ____		method agreed with buyer (e.g. ISO/AATCC)		optional
Colour fastness to light	grade ____		method agreed with buyer (e.g. ISO/AATCC)		optional
Pilling	grade ____		method agreed with buyer (e.g. ISO/AATCC)		fleece and French terry especially
Appearance after wash	no seam puckering, print cracking or distortion		method agreed with buyer (e.g. ISO/AATCC)		
Print adhesion / wash durability			method agreed with buyer (e.g. ISO/AATCC)		if printed
Seam strength			method agreed with buyer (e.g. ISO/AATCC)		optional
Restricted substances	buyer RSL		method agreed with buyer (e.g. ISO/AATCC)		e.g. azo dyes, formaldehyde, as your market requires
Needle / metal detection	pass		buyer policy		if the buyer requires it

AQL inspection (factory default; use your own)

Item	Value	Notes
Sampling standard	ISO 2859-1 / ANSI Z1.4 single sampling	factory default; use your own
Inspection level	General II	factory default; use your own
AQL major	2.5	factory default; use your own
AQL minor	4.0	factory default; use your own
AQL critical		set by buyer
Inspection stages	inline / final	who inspects: factory QC, buyer QC or third party

Defect classification — generic knitwear examples; agree the class of each with your buyer

Defect	Suggested class	What to look for	Notes
Broken needle or metal part in garment	Critical	any metal fragment	safety
Wrong fibre-content, care or origin label	Critical or major	label does not match the garment or market	compliance
Hole	Major	any hole in fabric or at seam	
Dropped stitch / ladder	Major	run in knit structure	
Needle damage	Major	cut or holed loops along seam lines	check after wash
Broken or open seam	Major	skipped, broken or open stitching	
Measurement out of tolerance	Major	any POM outside agreed tolerance	
Shade variation	Major	panels of one garment, or garment vs approved standard	
Barre (horizontal bands)	Major or minor	depends on visibility at the agreed distance	
Oil stain / dirt mark	Major or minor	depends on size, position and whether it cleans off	
Spirality / twisted side seam	Major or minor	side seam moves toward front or back	
Uneven hem, puckering, loose threads	Minor	workmanship	

Knitwear tech pack & QC · Origin & shipping docs

Origin paperwork by market for knitwear made in Nepal, as checked 30 Sep 2026. Not customs advice: confirm with your broker for each HS line.

Field	Value	Note
Exporter's REX number		EU public REX lookup: https://ec.europa.eu/taxation_customs/dds2/eos/rex_validation.jsp?Lang=en
Exporter name and address		

Market	Origin document	Who issues	Fields to check	Notes
EU	Statement on origin on the commercial invoice (or another commercial document), wording from Annex 22-07 to Regulation (EU) 2015/2447	The exporter in Nepal (REX-registered). No government-stamped certificate.	Exporter's REX number quoted; exact Annex 22-07 wording; place and date	Above EUR 6,000 of originating goods per consignment the exporter must be REX-registered. Form A is no longer valid for Nepal into the EU (since 30 June 2018). Check the REX number on the EU public lookup (link above).
UK	DCTS origin declaration on the invoice, packing list or delivery note	The exporter in Nepal. REX registration is not needed for the UK.	DCTS wording: "...these products are of Nepal preferential origin in accordance with the rules of origin of the Developing Countries Trading Scheme of the UK"	A Form A is accepted as an alternative and needs no official stamp. Proofs of origin are valid for two years from issue. Your UK customs agent claims the DCTS preference.
Canada	CBSA Form B255 (Certificate of Origin – Textile and Apparel Goods Originating in a Least Developed Country)	The exporter in Nepal where the goods were finished (not a trading house or forwarder). Importer must hold it when goods are declared.	Field 6 criterion: C for T-shirts (HS 6109); B for polos (6105) and most sweatshirts-hoodies (6110). Field 7: invoice reference.	Broker declares LDCT tariff treatment code 08. Importer keeps the B255 for 6 years. Commercial invoice cross-referenced to the B255, plus bills of lading showing route and any transshipment.
Japan	GSP Certificate of Origin Form A, per consignment	The competent authority in Nepal (through Nepal's official online GSP certificate system)	Goods description and HS code; origin criterion; consignment details	Small consignments are exempt: confirm current Japanese thresholds with your customs broker. Knitted apparel (Ch. 61) qualifies when manufactured from fabric (rule since 1 April 2015).
Korea	Certificate of origin in the form attached to Korea's LDC decree	The Government of Nepal or a body it designates	Imported materials ≤ 60% of the garment's FOB price (valued on arrival in Nepal incl. freight and insurance; materials made in Korea not counted)	Not needed when customs value is KRW 150,000 or less. Goods must travel directly (transit only for geographic/transport reasons, under customs control). Preference applies to goods declared up to 23 Nov 2029.
Australia	Manufacturer's declaration, can be written on the commercial invoice (refers to Division 1A of Part VIII of the Customs Act 1901)	The manufacturer / exporter. No official certification; a Form A with the invoice is an acceptable alternative.	Allowable factory cost ≥ 50% of total factory cost; materials from non-LDC developing countries (e.g. China, India, Vietnam) count only up to 25% of total factory cost	Factory keeps cost records supporting the 50% calculation in case the Australian Border Force asks.
US	No preference certificate: no preference programme applies (MFN / column 1 general rate)	—	Country-of-origin marking on each garment (e.g. "Made in Nepal"); commercial invoice, packing list, B/L or AWB	UFLPA: keep cotton traceability (fabric mill, yarn spinner, fibre origin declarations) to answer any US Customs enquiry. Confirm origin and duty per style with your broker.
